

Dear friends,

I would like to invite you this way to the 4th World University Baseball Championship in the Czech Republic. The Championship is coming back to Europe after six years, as the previous two editions were held in America and Asia.

The World University Championship is a meeting point of three levels:

- baseball is one of the Olympic Sports;
- it is an university sport;
- it is a professional sport.

As proved before, the Czech Republic is able to organize different kinds of events. I have personal experience as the athlete who competed many times in Czech Republic. Nowadays the Golden Spike is really a worldwide athletic event.

I gave the organizers all the advices I was able to. I believe that I will do the best to help them in future. If I am able I will come to see the games.

I would like to wish good luck to all the athletes and “let the best win”!

Sincerely,

Sergey Bubka
